Spelling and grammar are correct					X

What was your overall first impression of the website?

My first impressions of the website was really good. The overall layout look super modern and is very responsive for all devices. I also really liked the color scheme having the 3 variations of blue creates for a very pleasing look as well as making it easy to find information.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

The only issue I ran into was when clicking the more info button for dubs imagery one the home page.

What do you feel are the most effective design elements of this web portfolio?

I think the most effective design element is the overall layout. He did a great job a displaying consumable information that isn't overwhelming and made it easy to find information.

What would you suggest be changed with the design or content of this web portfolio?

Honestly there's not much I would change about the website, the only thing I can think of would be to put the contact form on a separate page and having a button on your about page that links to it.
