Portfolio gallery (thumbnails & captions)					x
Portfolio reflections/description pages					x
Contact page		x			
Reflections (description of portfolio pieces)					
Content of reflections appropriate					x
Project images are high quality					x
Spelling and grammar are correct					x

What was your overall first impression of the website?

Very well thought out and a very good design. The layout makes sense. The images and icons are very nice and well thought out. Overall a very nice portfolio website
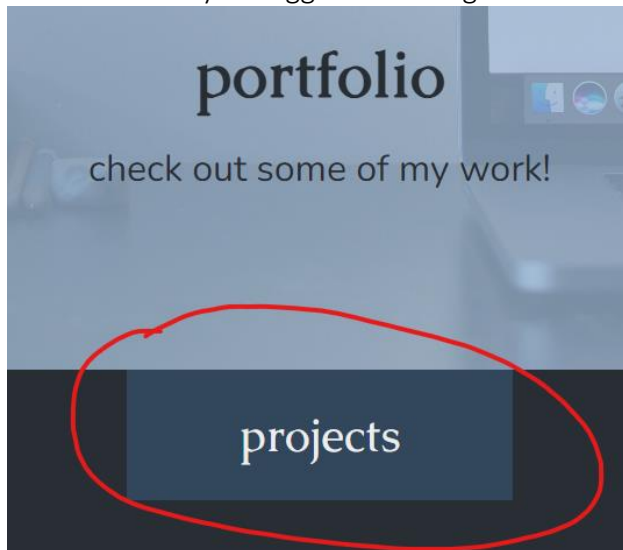

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

The contact section doesn't appear to be working. Or you hit submit and it gives the user no feedback as to whether it worked or not.

What do you feel are the most effective design elements of this web portfolio?

The icons and the images are fantastic. The website previews are very nice as well. I enjoy not having to go to those websites to see what they look like.

What would you suggest be changed with the design or content of this web portfolio?

These section separators/section titles need to be changed. They too closely resemble buttons and they don't really introduce the section properly. I would change these preferably something that doesn't look like a button! And I think something that takes the full width of the page would more closely match the overall design. The other thing that I would suggest as an improvement is a sub menu dropdown for the portfolio section. I think a little submenu with all the projects on it just so the user can get to those more info sections without having to scroll down the projects page would be a nice quality of life change. Also some front end feedback for the contact me section. Some input validation and maybe a toast message that your contact me request went through correctly. Other then that I have not other suggestions. Really good job!!
