What was your overall first impression of the website?

The site is nice and appealing upon first glance. Not overwhelmed with graphics or text walls.

Did you have any technical difficulties as you navigated through the pages and displayed theprojects?

None that I noticed.

What do you feel are the most effective design elements of this web portfolio?

The color scheme and layout tie things together. I would be so stoked if I was the client for this site.

What would you suggest be changed with the design or content of this web portfolio?

It probably was a choice of design, but none of the titles or the name start with a capital letter. It looks great and was probably intended. That is the only thing that I noticed that I would change personally. It is at least consistent and looks good with the way he currently has it.
